

Photography: Portraits

About the Course

This is a beginners course in portrait photography. This course is to introduce learners to the fundamental skills of portrait photography by developing their confidence and ability to operate a digital camera, understand basic exposure principles, and compose well-lit, focused portraits using both natural light and flash.

Course Learning Outcomes

- find the basic functions of a digital camera, including turning it on/off, using the viewfinder or screen, zooming, and taking a photo
- identify the three sides of the exposure triangle and identify a well exposed image
- compose and capture 3-5 portraits using natural lighting and flash, paying attention to subject positioning, background, and focus

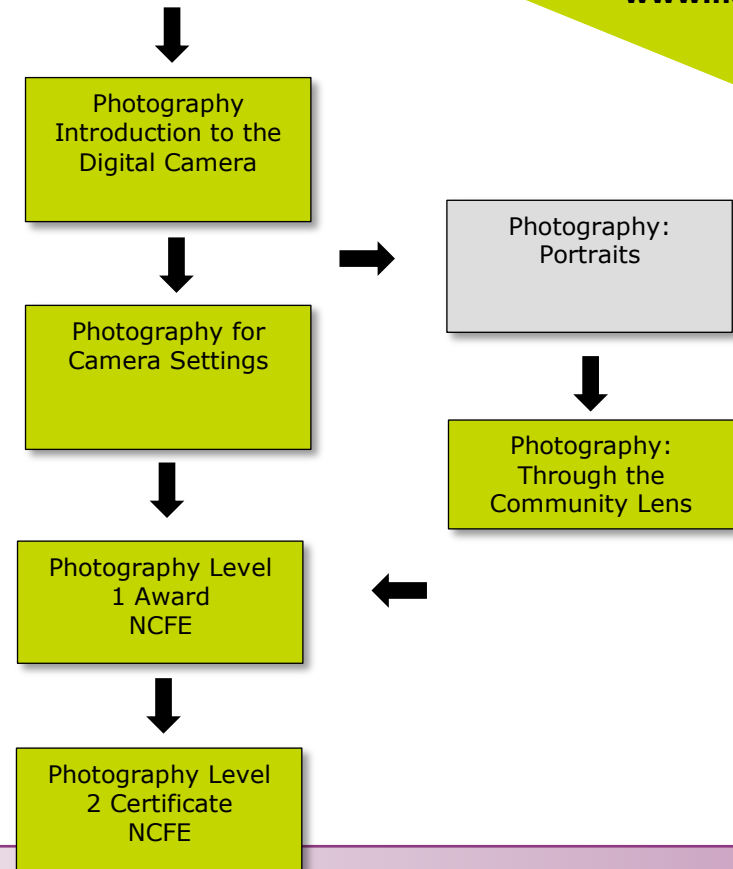

Please note: *To successfully complete this course, you must commit to full attendance and punctuality. You will also be required to use basic digital skills throughout the course to access and support your learning materials*

What is needed for the course

- There are no specific recommended prior learning requirements for this course. However, learners may find it helpful if they've already complete a complete beginners course in photography or any photography course

If you need any additional support, please call us: 02085836000
